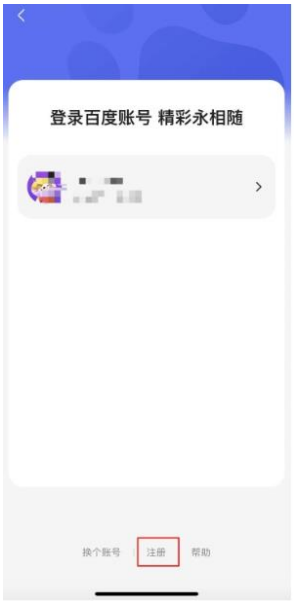
Apollo Account Registration Process

There are two primary methods to register for an Apollo account: using the Xiaodu App or a GitHub account.

Method 1: Using the Xiaodu App

- **Download the App:** Search for "Xiaodu" in your mobile app store and download it.

- **Access Registration:** Open the app and click the "Login with Baidu Account" button. Then, click "Register" at the bottom of the screen.



- **Enter Mobile Details:** Select the Hong Kong, China region (+852) and enter your mobile phone number. Click "Register Now".

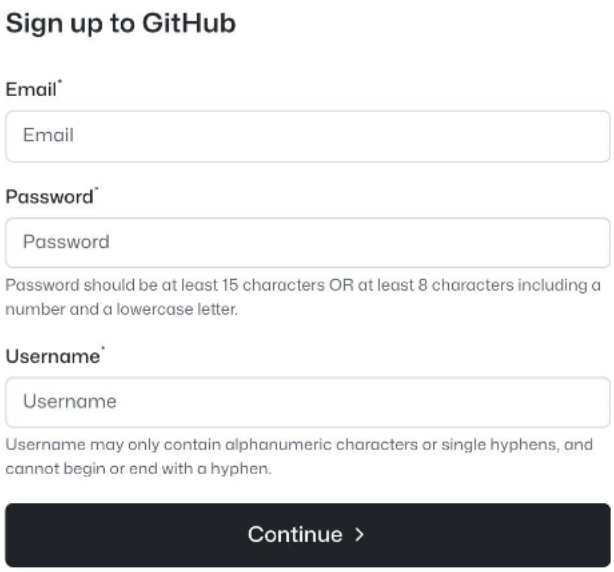
- **Verification:** You will receive a verification code, which may be sent via WhatsApp. Enter the code to complete the registration.
- **Website Login:** Open the official Apollo website on your computer: https://apollo.baidu.com/.

然後會彈出一個百度賬號登錄頁面：裏面有一個登錄二維碼

- **Hover and Select:** Hover over the Login button in the top right corner and select "Baidu Account".
- **Scan to Login:** A login page with a QR code will appear. In the Xiaodu App on your phone, click the QR code scan button in the top right corner to scan the code and complete the login verification.

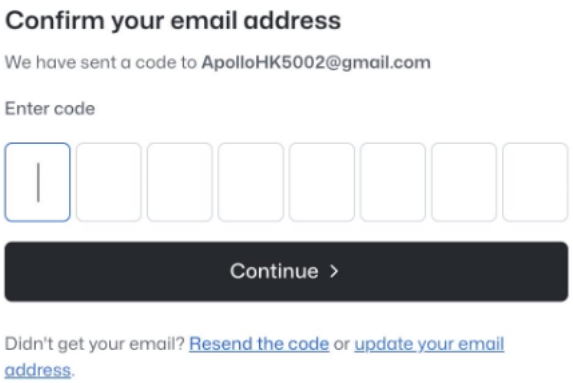
Method 2: Using a GitHub Account

- **Preparation:** Ensure you have an email address (e.g., Gmail, Yahoo, Outlook) to receive the verification code.
- **GitHub Sign-up:** Go to the GitHub registration page: https://github.com/signup.

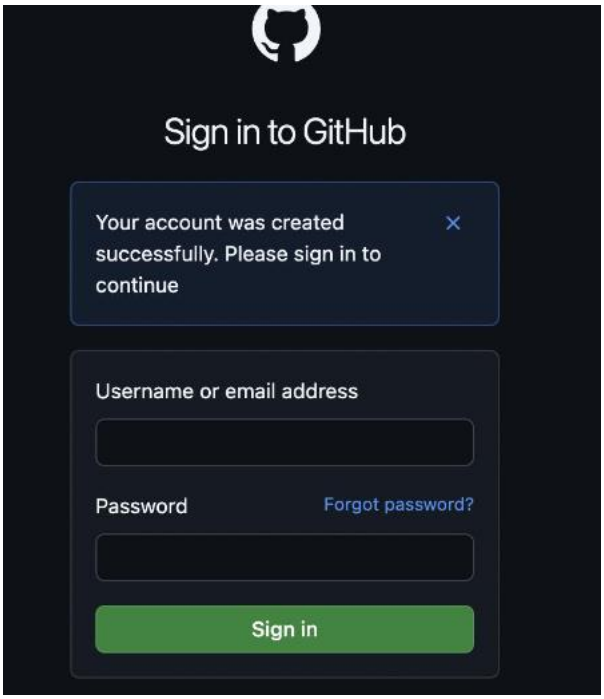


- **Enter Details:** Enter your email, a unique GitHub password, and a username. Click Continue.
- **Human Verification:** Complete the CAPTCHA (e.g., using arrows to select specific images, such as a picture without bread).

- **Email Verification:** Enter the verification code sent to your email address.



- **Apollo Website Login:** Once registered, visit https://apollo.baidu.com/.



- **Hover and Select:** Hover over the Login button in the top right corner and click GitHub.

- **Authorization:** A GitHub authorization window will appear. Click the green "Authorize ApolloAuto" button to complete the process.
